

Superglas® Reach-A-Light Ladder to EN131: Professional

The Clow Superglas® Reach-A-Light fibreglass combination ladder conforms with the new European *EN131: Professional* standard and offers a maximum load of 150kg.

The Superglas™ Reach-A-Light ladder can be used in a number of different configurations, including:

- A Single Section Ladder
- A Double Extension Ladder
- A Triple Extension Ladder
- A Double Sided Ladder
- A Free-Standing Ladder

Designed for access where where additional stabilising support is limited, the Clow Superglas® Reach-A-Light Ladder is suitable for a wide range of outdoor and indoor uses.

The non-conducting properties of fibreglass make this ladder ideal for use within the electrical industry.

- Insulated
- Robust & durable
- Easily transported
- Safety rung locks
- Non-slip feet

Conforming with *EN131: Professional*
Maximum load 150kg.

Code	Rungs Per Section	Length per Section	A-Frame Height	Maximum Freestanding Height	Maximum Extended Length	Weight
