Clow Safety Inspection Tags

Keep your equipment users safe – use the Clow Safety Tag to ensure your ladders, steps and access equipment are identified as safe and fit for purpose.

Durable, flexible and easy to use, the Clow Inspection Tagging System is designed to provide the assurance that equipment is being properly inspected and maintained.

Clow Safety Inspection Tags can be used on all equipment where there is a legal requirement to have the item inspected on a regular basis - this includes ladders, steps, Platforms and towers.

Clow Inspection Tags provide a simple visual check of an item

of equipment's last inspection date and next due inspection date. If equipment fails to pass an inspection then it can be immediately identified and marked as unfit for purpose by flipping the Clow Tag to show the reverse side marked in bright red "Do Not Use This Equipment".

The Clow Tag Inspection Tag is protected by the clear view Clow Tag Envelope System - the Inspection Tag status can then be clearly displayed. The Clow Tag Envelope System clips shut and securely holds the Inspection Tag in place.

All Clow Ladders, Steps and Towers are inspected and fitted with Clow Inspection Tags and Holders prior to despatch.
