Class 1 Aluminium Extension Ladders

This range of Class 1 Aluminium Extension Ladders are specifically designed to withstand the rigours and hazards of heavy duty use.

Fitted with the unique Clow 'D' shaped Safety Rung, the flat-topped rungs provide maximum comfort and safety. In addition, the heavy gauge box section stiles, complete with serrated edges offer a secure handhold and positive grip to walls, sills and gutters. Ladder hooks, designed to provide a smooth and secure extension action, are fitted as standard on these Push Up Extension Ladder models.

This Class 1 Aluminium 'D' Rung Push Up Extension ladder is available in dual, (ID), and triple, (IT), section lengths. With a Class 1 rating these ladders support a maximum static load of 175kg.

These ladders can also be supplied and fitted with optional extras including wall wheels, (allowing easy and controllable ladder extension and height adjustment), and pole hoops, (for secure and safe positioning against a pole or lamppost).
