Industrial BS2037 Class 1 Aluminium Platform Steps

The new design of platform steps intended to give long service in arduous industrial conditions.

Industrial Aluminium Platform Steps can be fitted with optional handrails, kneerails and stabiliser bars.

Handrails can be fitted to the left or right hand side of the step or both sides if required.

A kneerail, fitted to the top of the step, offers extra grip to the user.

A stabiliser bar can also be fitted to the bottom back legs of the step – this adds extra stability and helps prevent side slip when using the step.
