

Clow Aluglas® Single Section Ladder

The Clow Aluglas® range of ladders combine high quality box section stiles with Aluminium Rungs. The combination of high quality glassfibre stiles and aluminium rungs produces a ladder which is strong, lightweight and extremely durable.

The rectangular pultruded box section stiles are manufactured from glass reinforced plastic and are securely fitted with with Clow 'D' shaped aluminium rungs.

With exceptional weather and chemical resistance together with high electrical resistance, Aluglas® Ladders can offer an ideal solution for use within extreme environments.

Aluglas® Leaning Ladders comply with European Standard EN131, British Standard ESI 13-1 and the relevant electrical requirements of American ANSI 14.5.

These ladders support a maximum load of 150kg.

Aluglas® Single Section Ladder			
Code	Length	Rungs	Weight
AGS8	2.44m (8')	16	17.7kg
AGS10	3.05m (10')	20	22.1kg
AGS12	3.66m (12')	24	25.9kg
AGS14	4.28m (14')	28	29.6kg
AGS16	4.88m (16')	34	33.4kg
AGS18	5.39m (18')	38	37.1kg
AGS20	6.10m (20')	42	40.9kg
