

## Clow Euroglas® Single Section Ladder

The Clow Euroglas® Single Section Ladder is ideal for use within environments where there is any risk of exposure to electrical current due to it's non-conductive all glassfibre construction.

The combination of high quality pultruded box section stiles with serrated non-slip, resin matrix glass reinforced tubes which are securely bonded into the ladder stiles produces a ladder which is strong, lightweight and extremely durable.

With exceptional weather and chemical resistance together with high electrical resistance, Euroglas® Ladders offer an ideal solution for use within extreme environments.

Euroglas® Leaning Ladders comply with European Standard EN131, British Standard ESI 13-1 and the relevant electrical requirements of American ANSI 14.5 supporting a maximum load of 150kg.

Euroglas® Single Section Ladder			
Code	Length	Rungs	Weight
SEG08	2.44m (8')	8	8.8kg
SEG10	3.05m (10')	10	11.0kg
SEG12	3.66m (12')	12	14.8kg
SEG14	4.28m (14')	14	14.8kg
SEG16	4.88m (16')	17	16.7kg
SEG18	5.39m (18')	19	18.5kg
SEG20	6.10m (20')	21	20.4kg
