

Clow Euroglas® Insulated Platform Step

The Euroglas® 'Tradesman' Stepladder is an all-fibreglass construction resulting in a lightweight but extremely strong non-conducting stepladder.

The broad 170mm top platform depth of this swingback step, combined with the deep 80mm treads, ensures a very safe and stable set of steps. The serrated non-slip treads provide a sure foothold and are double riveted to the stepladder stiles for secure fixing.

The platform size for all sizes of EGPS Platform Steps is 350 x 495 x 300mm, creating a tapered effect.

Euroglas® Standing Ladders are manufactured to comply with European Standard EN131, British Standard ESI 13-1. These steps safely support a maximum load of 150kg.

Euroglas® Tradesman Industrial Platform Steps			
Product Code	Treads	Height	Weight
EGPS3	3	0.88m (2'9")	5.0kg
EGPS4	4	1.16m (3'8")	6.4kg
EGPS5	5	1.43m (4'7")	7.7kg
EGPS6	6	1.70m (5'6")	9.1kg
EGPS7	7	1.98m (6'5")	10.5kg
EGPS8	8	2.26m (7'4")	12.3kg
EGPS9	9	2.53m (8'3")	14.1kg
EGPS10	10	2.80m (9'2")	16.4kg
