

Clow Aluminium Pointer Window Cleaners Ladder

The Clow VPSA & VPDA ladders are specially designed for the window cleaning trade.

These robustly constructed aluminium single section and double section ladders are manufactured using a rectangular box section stile and have heavy duty non slip round rungs designed to withstand the constant and arduous use that is required of the window cleaning trade.

They come fitted as standard with a white rubber hard wearing top block and solid rubber non slip feet.

Both the single section and double section models have

splayed bases for added safety, this helps to reduce the risk of the ladder twisting when in use.

Double Pointer Window Cleaners Ladder		
Code	Size	Rungs per Section
VPDA6	2X6'	6
VPDA7	2X7'	8
